DaTacarD® ID Works® VIsITor Manager sofTWare

Ideal for securIty-mInded enterprIses
as an affordable and easy-to-use solution, datacard® Id Works® Visitor manager software is ideal for any enterprise concerned about improving security. popular applications include:

- *Managing frequent visits from contractors, vendors and customers in large corporate environments*
- *Controlling access to government agency facilities*
- *Maintaining safety and security in K-12 schools, colleges and universities*

The fast, secure solution for automatic visitor enrollment

With Datacard® ID Works® Visitor Manager software, you can enroll visitors with their government-issued credentials and produce secure ID cards quickly and costeffectively. At check-in, visitors present a driver's license, passport or other credential. ID Works Visitor Manager software scans it and produces a secure ID card in seconds.

- **Lower costs, easier operation.** ID Works Visitor Manager software streamlines registration, saving time, minimizing errors and reducing costs. It also makes the process easier to manage. The software creates a database of visitor photos and demographics, which can be retrieved easily to produce IDs for repeat visitors. It scans cards at check-in and check-out to create a log of visitor activity. Plus, it compares visitor names to a list of barred entrants, flagging any matches or similar names.

- **Easy pre-registration.** To speed enrollment for large groups, ID Works Visitor Manager software allows you to register visitors' names in advance, then complete the process as each visitor's credential is scanned upon arrival.

- **Enhanced functionality.** With this release of ID Works Visitor Manager software, you can download new card templates over the Web as soon as they are available. Plus, the software automatically detects the state and country of scanned credentials, which eliminates another step in the issuance process.

Datacard Group

DaTacarD® ID Works® VIsITor Manager sofTWare

When visitors leave your facility, they swipe their ID card at a security workstation and return it for storage or disposal. Or, your team can check visitors out manually with an easy, one-click sign-out process. Either way, the software automatically updates your records and compiles them in a real-time visitor's log book — allowing you to create detailed reports.

standard Features

Seamless data capture from government-issued ID cards or passports

Barred list module to prevent unwelcome visitors from entering

Automated check-in/check-out visitor management process
